Issuer's website: www.icam.hr. Telephone: +385 14825868.

Regulator: The Croatian Financial Services Supervisory Agency is responsible for the supervision of InterCapital Asset Management d.o.o. regarding this key information document.

Key information document from 14 February 2025

You are about to buy a product which is not simple and may be difficult to understand

What kind of product is this?

Type: This product is an open-end investment sub-fund with public offering (UCITS) which was established and managed by the Issuer within the umbrella fund consisting of several sub-funds.

Objectives: InterCapital BET-TRN UCITS ETF is an index equity open-ended investment sub-fund with a public offering (UCITS) whose investment objective is to replicate the structure of the Bucharest Stock Exchange BET-TRN index. The BET-TRN index, consisting of at least 10 and at most 20 shares, is used as a benchmark for evaluating the return achieved by the Sub-fund. The expected difference in yield under normal market conditions is shown in the Sub-fund's prospectus. You can find more information about the BET-TRN stock index on the website of the Bucharest Stock Exchange (www.bvb.ro). As a rule, the shares that are part of the BET-TRN index are the most liquid shares on the Romanian capital market. The sub-fund will be permanently exposed to the stock market with a minimum of 90% of its net assets. The sub-fund is managed passively, which means that the assets of the sub-fund are invested in shares that are part of or will be added to the BET-TRN index. For this reason, the Sub-fund follows the downward and upward trend in the value of the BET-TRN index. The entire profit is automatically reinvested in the Sub-fund. Income from dividends is added to the assets of the Sub-fund. Fees and operating expenses are charged from the assets of the Sub-Fund, which reduces the return compared to the return of the BET-TRN index. The profit of the Sub-fund is contained in the value of the unit, and the profit is realized by fully or partially selling the units of the Sub-fund. Only authorized participants can request the purchase of units from the management company, and other investors only exceptionally and in the event of a disturbance in the market that exists if the stock exchange value of the units deviates by 10 (ten) % or more from their value on the primary market. The Fund can invest in financial derivatives, forward and option contracts for the purpose of risk protection or achieving investment goals. By using the mentioned contracts and investing in financial derivatives, the effect of financial leverage is generated. This type of investment opens up the possibility of achieving higher returns, but it also implies

higher risk, which can cause increased volatility of the Fund. The net assets of the Sub-Fund may show a high level of volatility (change in unit price) due to the composition of the portfolio, which means that due to the high exposure to shares, the unit value may have higher fluctuations (downward and upward movements) in a short period of time. For the above reason, the Sub-fund is primarily intended for investors who are ready to invest for a longer period of time with the possibility of achieving high returns due to exposure to the stock market. By replicating the index, the sub-funds inherit the characteristics of the same, including those concerning sustainability. The composition of the index, i.e. its characteristics, which include the approach to sustainability, environmental and social characteristics, is determined by the index administrator. Recommendation: this Sub-Fund is not suitable for investors who intend to withdraw their money before the fifth year of investment.

Targeted small investor: The Sub-fund is primarily intended for investors who wish to be exposed to the Romanian equity market, those who wish to invest for a period longer than 5 (five) years, and those who are ready to accept high risk.

Product term (duration): The Sub-fund is established for an indefinite period of time, i.e., it does not have a target maturity date. The issuer has the right to unilaterally liquidate the Sub-fund. The Sub-fund may be liquidated in cases prescribed by the Rules of the Umbrella Fund and by the applicable national and EU regulations governing the operations of companies for management of open-end investment funds with public offering.

Detailed information about the Sub-fund may be found in the Rules, financial statements and other documents of the Sub-fund and the Issuer, available on request, in the business premises of the Issuer at the address: Masarykova 1, Zagreb, or published on the website of the Issuer, where the latest Unit price is also available. The documents are available free of charge in the Croatian language.

The depository of the Fund is OTP banka d.d. with its registered office in Split, Domovinskog rata 61.

What are the risks and what could I get in return?

Risk indicator

The aggregate risk indicator serves as a guideline for the level of risk of the Sub-fund compared to other products. It shows how likely it is that you will lose money on the product due to movements in the markets or due to the inability of the issuer of the security or the counterparty to meet its obligations to the Sub-fund.

The assumption of the risk indicator is that you will hold the product for 5 years. The actual risk may vary significantly if you cash out the product early, and the amount you get back could be lower.

The product is in category 4 out of a possible 7, which indicates a medium risk category. It is hereby assessed that possible losses from future activity will be at a medium level, and bad market conditions could affect the future yield of the sub-fund and the yield of your investment.

The sub-fund's investment strategy includes the use of financial derivatives, which can potentially increase the gains or losses that the fund realizes and increase the volatility of the sub-fund's price.

The Sub-Fund does not include any protection against future market movements, so you could lose some or all of your investment.

In addition to the risks covered by the summary risk indicator, other risks may also have an impact on the results of the sub-fund. A detailed description of the risks is provided in the Fund's Prospectus in the "Risks" section.

Success scenarios

The amount you will get from this product depends on future market movements. Future market developments are uncertain and cannot be accurately predicted. The presented unfavourable, moderate and favourable scenarios are examples of the worst, average and best performance of the Sub-fund, i.e., the reference value in the last 10 years. Future market movements could differ significantly from that.

Recommended holding period:		5 years	
Investment:		10,000 EUR	
Scenarios		In case of exit after 1 year	In case of exit after 5 years
Minimal	No minimum yield is guaranteed. You could lose some or all of your investment.		
Stress scenario	Amount you could get after deducting expenses	1,984.25 EUR	2,822.53 EUR
	Average annual yield	-80.16%	-22.35%
Unfavourable scenario <i>The result of investment, i.e., the movement of the reference value between 12/2023 and 12/2024</i>	Amount you could get after deducting expenses	8,728.34 EUR	11,418.32 EUR
	Average annual yield	-12.72%	2.69%
Moderate scenario <i>The result of investment, i.e., the movement of the reference value between 02/2016 and 02/2021</i>	Amount you could get after deducting expenses	11,503.54 EUR	21,851.53 EUR
	Average annual yield	15.04%	15.83%
Favourable scenario <i>The result of investment, i.e., the movement of the reference value between 01/2019 and 01/2024</i>	Amount you could get after deducting expenses	15,530.72 EUR	29,117.59 EUR
	Average annual yield	55.31%	23.83%

This table shows the money you could get back in the next 5 years, under different scenarios, assuming you invest 10,000 EUR. These scenarios show how successful your investment could be. You can compare them with scenarios for other products.

The amount you will get from this product depends on future market movements. Future market developments are uncertain and cannot be accurately predicted.

The stress scenario shows the return you could get in extreme market conditions and does not take into account situations in which the issuer of the security or the counterparty are unable to meet the obligations to the Sub-fund.

The figures shown include all the costs of the product itself, but may not include all the costs you pay to your consultant or distributor. The figures do not take into account your personal tax situation, which may affect the amount of your return.

What happens if InterCapital Asset Management is unable to make a payment?

Payments from the buyback of units are made from the Sub-fund assets, and the possibility of making the payment depends on the level of liquidity of the Sub-fund assets. The Sub-fund assets are held and managed separately from the assets of InterCapital Asset Management and other Sub-funds managed by the Company. The Sub-fund assets are not part of its assets, liquidation or bankruptcy estate and cannot be subject to execution for the purpose of settling claims from the Company, therefore the possibility of payment does not depend on the Company's creditworthiness or its assets. A possible financial loss caused by investing in this product is not covered by any guarantee program.

What are the costs?

The person who advises you about this sub-fund or sells it may charge you other costs. In that case, that person will give you information about those costs and how they will affect your investment.

Costs over time

The tables show the amounts charged from your investment to cover various types of expenses. Those amounts depend on the amount of your investment and the period of holding the product. The amounts shown here are only examples made based on a sample investment amount and possible investment periods.

We assumed the following:

- In the first year, your return would be equal to the amount of your investment (annual return of 0%).
For other holding periods, we applied the product performance assumption shown in the moderate scenario
- The investment amounts to 10,000 EUR

Investment:	10,000 EUR	
	In case of exit after 1 year	In case of exit after the recommended holding period (5 years)
Total costs	98 EUR	1,046 EUR
Annual cost effect (*)	1.0%	1.0%

(*) This shows how costs reduce your yield every year during the holding period. For example, if you exit at the end of the recommended holding period, the projected average annual yield is 17.81% before expenses and 16.87% after expenses.

Cost breakdown		
One-time costs upon entry or exit*		In case of exit after <i>one year</i>
Entry costs	No entry fee is charged for this sub-fund	0 EUR
Exit costs	No exit fee is charged for this sub-fund.	0 EUR
Ongoing costs (incurred every year)		
Management fees and other administrative or business expenses	0.76% of the value of your investment annually. It includes a management fee that amounts to a maximum of 0.60% per year, a depository fee that amounts to 0.11% per year, and other operating expenses of the Sub-fund. This is an estimate based on the actual costs in the previous year.	76 EUR
Transaction costs	0.22% of the value of your investment annually. It is an estimate of costs that arise when we buy and sell the underlying investments for the Sub-fund. The actual amount will depend on the amount of buying and selling.	22 EUR
Occasional expenses incurred in special circumstances		
Performance fees (and profit share fees)	No performance fee is charged for this sub-fund.	0 EUR

*This Sub-fund is an ETF, which means that investors who are not Authorised Participants must in principle buy or sell the Sub-fund's units on the Secondary Market. When buying and selling Units through the Secondary Market (as a buyer or a seller), you will be obliged to pay an intermediary fee (brokerage fee) to the intermediary, investment company or credit institution that provide the investment service for order execution on your behalf.

How long should I hold the product and can I withdraw money early?

The recommended holding period is selected based on the strategy and investment objectives of the Sub-Fund. The recommended minimum holding period is five years. Redemption of units in the Sub-Fund is possible even before the end of this period, but it is not recommended, since in that case there is a possibility that the Sub-Fund will not achieve its investment goal, and the amount you get back may be lower than expected.

You can submit a request for units redemption every working day, as defined in the Prospectus and the rules of the Sub-fund. In this Sub-Fund, no exit fee is charged. Information about the exit fee and other product costs is shown in the section "What are the costs?"

How can I complain?

Complaints may be submitted by existing or former (inactive) clients of the Issuer and/or their representatives. The complaint should be written in English or Croatian and submitted to the Company via the complaint form and signed by the complainant. Regardless of the aforementioned, the Company will respond to the complaint even if all the aforementioned assumptions are not met.

Complaints are received in writing at the following addresses:

- INTERCAPITAL ASSET MANAGEMENT d.o.o., Masarykova 1, 10 000 Zagreb (to the attention of the holder of the compliance function)

- or to the e-mail address: icamcompliance@intercapital.hr.
